

EX-VESSEL DOSIMETRY MEASUREMENT EQUIPMENT FOR WWER-1000 REACTOR

V. N. Bukanov, E. G. Vasylyeva, V. L. Dyemokhin, A. M. Pugach

The detailed description and the background of the construction of the special equipment used in the WWER-1000 pressure vessel radiation exposure determination technique for placement of neutron-activation detectors at the outer surface are given. The detector high coordinate determination technique is presented.
