

## **MAIN POSITIONS OF V&V PROCEDURE FOR THE SOFTWARES USED AT REACTOR PRESSURE VESSEL DOSIMETRY**

**V. N. Bukanov, V. L. Dyemokhin, I. I. Lipsky**

Modern approaches to V&V procedure of software are considered and analyzed. It is shown that V&V procedure should include three stages: qualification, verification and validation. Main positions of V&V procedure for the software to be a component of VVER pressure vessel irradiation conditions determination technique are worked out.
